Known For Their Purity

McGowin Seed Co.

MOBILE, ALABAMA

Royal and Conti Streets

 We exercise the greatest care to furnish seeds that are pure and reliable, but owing to the various conditions of climate, soil and cultivation attending success, warrant nothing in any particular whatever.

NOTE: Have You Forgotten Anything?

I am anxious to obtain the names and correct postoffice addresses of a number of your friends and acquaintances who are farmers and gardeners who you think would be interested in my Catalogue. I am extremely anxious that this list be made absolutely correct so far as postoffice, name and rural route is concerned, and in order that you may use care in compiling same. I will give you FREE an assortment of FOUR of my choice strains of DESIRABLE VEGETABLE SEEDS, my selection for garden use, if you will fill out the blank below and send it with an order for Seed or other articles selected from my Catalogue.

NAMES	POSTOFFICE	R. F. D.	COUNTY	STATE

To McGOWIN SEED CO.—The above list of names is correct.

Please sign your name and address here:.....

Your money's worth or your money back. This is part of my guarantee. It is mutually agreed and understood that the seed or other goods ordered of me may be returned any time within 10 days upon receipt of same, if not satisfactory. The money paid for them will be refunded, and I cannot in any way warrant the crop, as it is dependent on so many conditions beyond my control.

Have I your permission to substitute equal or better in nearest variety I can supply if out of variety ordered?.....

If I can give you better service by shipping prepaid express instead of price postpaid, may I do so?.....

MULFORD CULTURES

SMALL COST LARGE RETURNS EASY TO USE
 MULFORD CULTURES contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of Legumes or soil. Enormous numbers of these very valuable and desirable bacteria are thus available to you in every package of Mulford Culture and may readily be applied to your seed without previous experience or special implements. The sealed bottle insures purity.

INCREASE YOUR CROP—IMPROVE YOUR SOIL.
 Legumes offer the best known means of maintaining soil fertility and rejuvenating overcropped and worn-out fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.
 The U. S. Department of Agriculture and State Agriculture Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "Catch" and increase your yield.
 Mulford Cultures are scientifically prepared and tested by experts in the biological laboratories of H. K. Mulford Co., Philadelphia, Pa., with the same degree of care as Mulford Antitoxins, Serums, Vaccines, etc., which are standard all over the world.
 Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume: Alfalfa, Crimson Clover, Sweet Clover, White Clover, Red Clover, Alsike, Burr Clover, Cow Peas, Soja Beans, Peanuts, Vetch, Velvet Beans, Sweet Peas, Garden Peas, Garden Beans, Lima Beans and Lespedeza.
 Mulford Cultures are supplied for the varieties of legumes listed at the following prices:
 5 Acre Size \$5.00
 1 Acre Size \$1.50
 1/4 Acre Size50
 Small Size (supplied only in 4 varieties, for Garden Peas, Garden Beans, Lima Beans and Sweet Peas)..... .25
